PROJECTS

UNITED ENERGY COMPANY JSC

Automated Maintenance and Repair Scheduling System for United Energy Company JSC

APPLICATION

The system reduces the time for development and coordination of industrial repair program plans, automatically build any reporting and analytics, keep records of all maintenance and repair operations stating their actual costs, monitor the technical condition of the equipment, keep records of emergency and planned outages.

FEATURES

- ◆ Integration with SAP ERP, 1C, Active Directory
- ◆ A unique complex business process for repair plan coordination.
- ◆ 8 stages of approvals, parallel and consistent approvals.
- ◆ Generation of complex reports in a browser and their export to Excel
