PROJECTS

DECLARATIONS OFFLINE

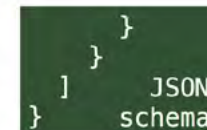

Development of an offline client for the module of declarations on energy resource consumption

APPLICATION

Offline client for the module of declarations allows introducing the information on energy resource consumption in reporting entry forms without the use of the Internet. The module of declarations on energy resource consumption is the result of an update of the state information system in the field of energy-saving and increase in energy efficiency, and its component energy audit management subsystem, in terms of automation of the new process – assessment of energy efficiency level of public sector buildings.

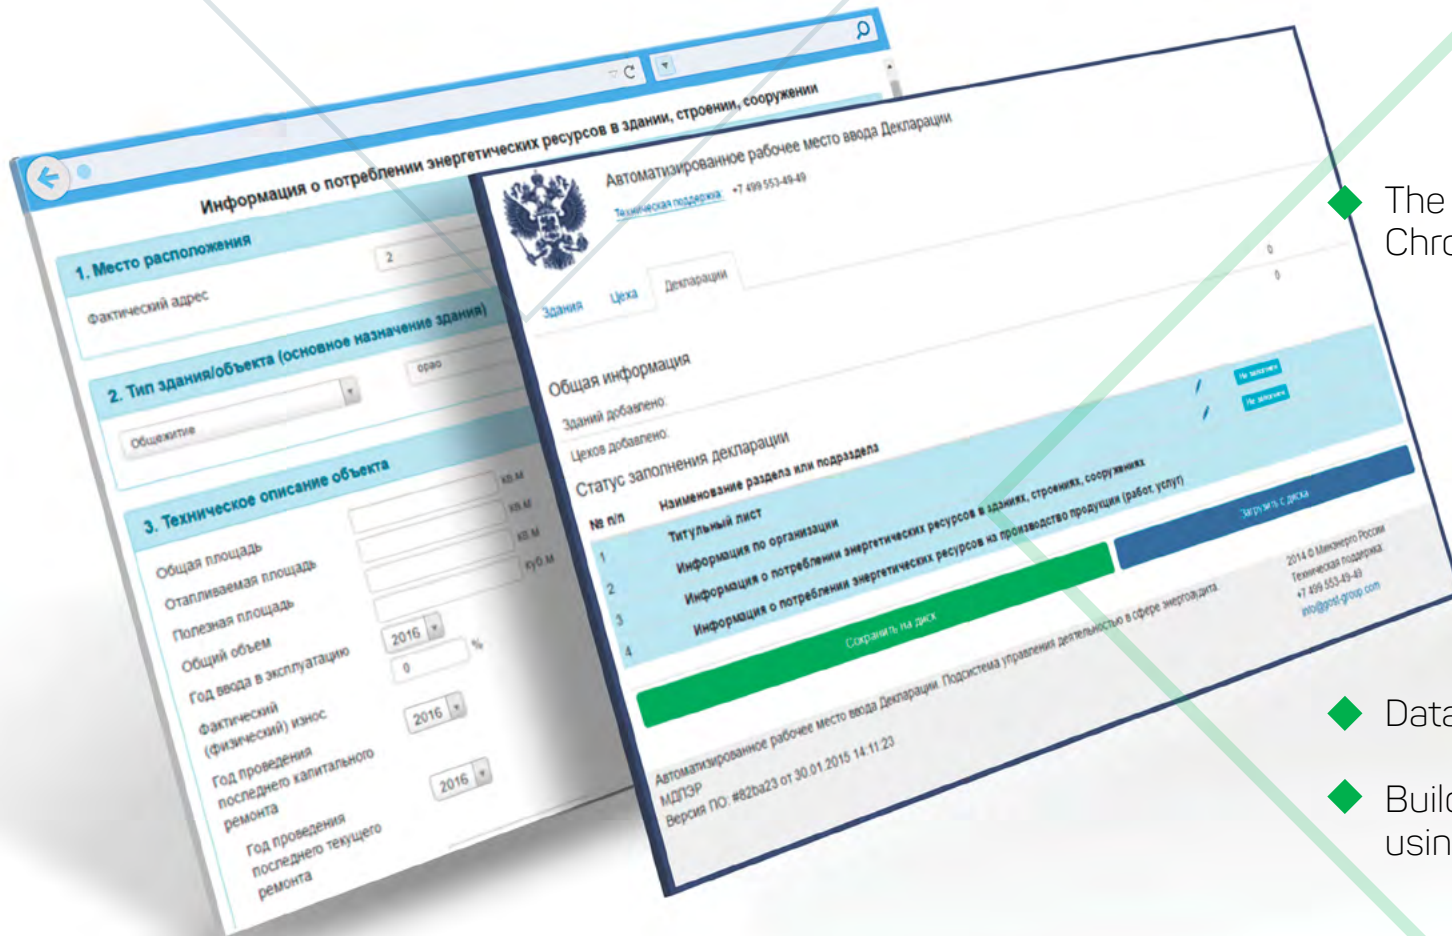

МИНИСТЕРСТВО ЭНЕРГЕТИКИ
РОССИЙСКОЙ ФЕДЕРАЦИИ

FEATURES

- ◆ **100% OFFLINE OPERATION**, synchronization when connected to the Internet

- ◆ The use of proprietary Chromium browser build
